CALL BEFORE YOU DIG SOLUTION TO DOCUMENT UTILITY LOCATING TICKETS AND PRINT USING CUSTOM TEMPLATES

MARK 811

ArcGIS WebApp Builder Widget

Mark 811 is a ready-to-use and configurable widget for web and mobile environments. This widget enables employees and contractors to mark up (document) located facilities by using a digital map and generate resulting manifests for submission to the appropriate one call center.

This simple to use tool extends the power of your organization's GIS to include 811 functions and provides a methodical workflow to standardize and manage these activities. It is accessible using web browsers on desktops and mobile devices and includes the functionality to generate multi-page PDF's with your custom legends, logos, and printing templates.

Business Problem

- Lack of a clear understanding of the location of underground assets
- Manual, time-consuming, process to collect all information required to respond to digging requests

Business Solution

- Fully automated and standardized approach to handle digging requests
- Fully operational response environment
- Historical information related to both the requests and responses

Increased Efficiency

Reduced Cost

On-Time Responses

ACCELERATED ABILITIES

## ACCELERATE FOCUSED ABILITIES OF YOUR GIS

Our purpose-built Ability Accelerators provide a simplified approach to improve collaboration and deploy widely used functionality. Our tools are focused on accelerating your ability to derive value from your GIS by improving the use-ability, interoper-ability, and scale-ability of your GIS.
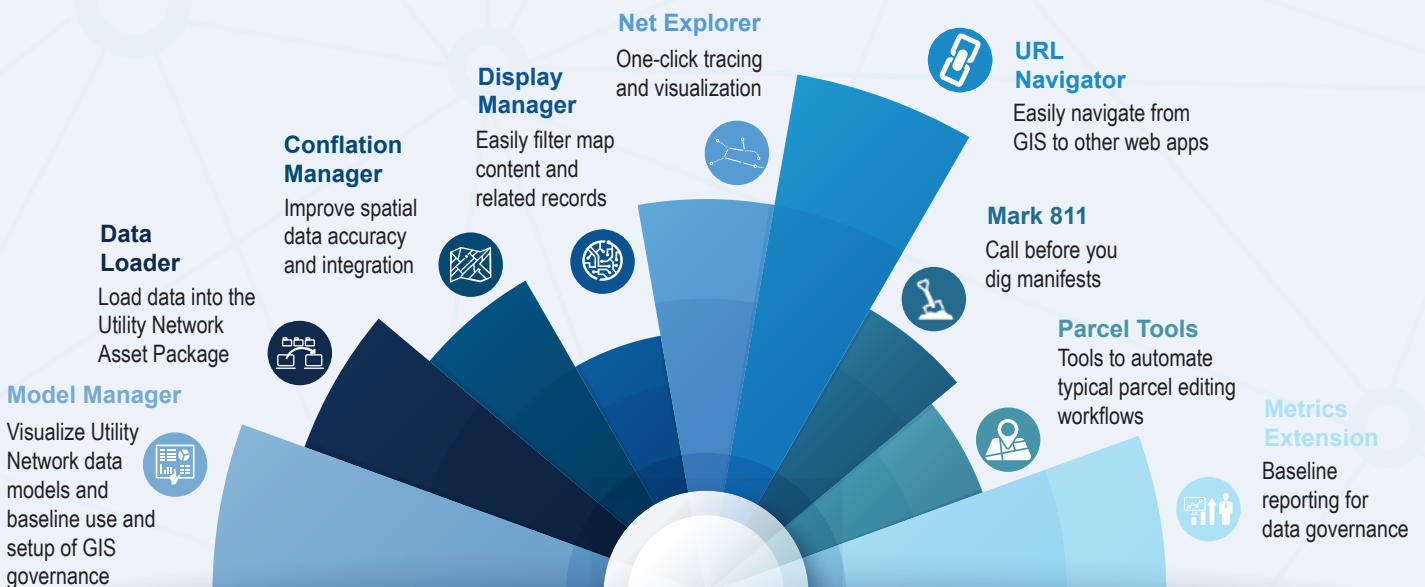

USE-ABILITY

INTEROPER-ABILITY

SCALE-ABILITY

Net Explorer
One-click tracing and visualization

Display Manager
Easily filter map content and related records

Conflation Manager
Improve spatial data accuracy and integration

Data Loader
Load data into the Utility Network Asset Package

Model Manager
Visualize Utility Network data models and baseline use and setup of GIS governance

URL Navigator
Easily navigate from GIS to other web apps

Mark 811
Call before you dig manifests

Parcel Tools
Tools to automate typical parcel editing workflows

Metrics Extension
Baseline reporting for data governance

Supported by comprehensive managed data services to unburden both your organization and budget, allowing you to augment your operations.
